***In vivo* NeuroScientist – Grenoble, France**

SynapCell is an innovative company providing pharmaceutical and biotech industries with drug discovery solutions for CNS pathologies, based on EEG biomarkers and predictive animal models.

We are currently seeking an experienced *in vivo* neuroscientist for a position offering career advancement opportunities. The position is based at the company's headquarters in Grenoble, France.

The ideal candidate holds a Ph.D. in neurosciences with proven research skills in *in vivo* neurophysiology with competencies in neurodegenerative disorders and pharmacology.

The candidate will provide scientific and creative leadership, demonstrate excellent communication and interpersonal skills.

He/she will play a key role in developing and implementing the company's innovation strategy and provide creative input for the development of new solutions for the benefit of patients with CNS diseases.

Responsibilities will include the design and management of research projects from the planning phase and execution of *in vivo* experiments through to deliverables.

The candidate will be in close interaction with company's collaborators, customers and research partners.

Desired background

- Ph.D. in neurosciences with a postgraduate experience
- Broad knowledge in rodent models of neurodegenerative disorders is a must
- Knowledge in signal analysis would be a plus
- Ability to develop research strategies and to translate them into concrete plans and actions
- Fluent in English and conversational skills in French
- Good teamwork and interpersonal skills
- Desire to be part of a growing, innovation-driven business
