*«Grenoble healthcare ecosystem is dynamic, exciting and of very high quality. It is essential for us to be involved in this ecosystem, to find local partners and to support each other by sharing our experience between medical companies.»*

Cécile REAL - CEO and co-founder ENDODIAG

*«Grenoble's local ecosystem is invaluable for creating a startup in the field of innovative medical devices, such as a mini-laboratory for IVD. Building on a strong tradition of research and innovation, top research centers, a university hospital and companies in Medtech, all the necessary skills are available locally to create and grow an innovative company like Avalun. The entire ecosystem is represented in Medicalps, its local Medtech cluster.»*

Vincent POHER - CEO  
AVALUN
